Contents

Chapter 1	Introduction	1
------------------	---------------------	----------

Section I Modeling

Chapter 2	External evaluation of population pharmacokinetic models of vancomycin in large cohorts of intensive care patients	15
Chapter 3	Pooled population pharmacokinetic modeling for exploring ciprofloxacin pharmacokinetic variability in intensive care patients	33

Section II Methodology

Chapter 4	Why we should sample sparsely and aim for a higher target: lessons from model-based therapeutic drug monitoring (TDM) of vancomycin in intensive care patients	51
Chapter 5	Optimizing predictive performance of Bayesian forecasting for vancomycin concentration in intensive care patients	71

Section III Application

Chapter 6	Right Dose, Right Now: development of AutoKinetics for real time model informed precision antibiotic dosing decision support at the bedside of critically ill patients	95
------------------	---	-----------

Chapter 7	Right Dose, Right Now: bedside data-driven personalized antibiotic dosing in critically ill patients: rationale and design of a multicenter randomized controlled trial	125
Chapter 8	Right Dose, Right Now: bedside data-driven personalized antibiotic dosing in critically ill patients: a multicenter randomized controlled trial	147
Chapter 9	Summary	173
Chapter 10	Discussion and perspectives	181
	Acknowledgements	189
	Curriculum Vitae	191
	List of Publications	193
